Which enable the carbon fiber packing be suitable for high speed dynamic seal application and longer working life due to its low abrasive resistance and high strength. The max. The Gland Packing is a sealing element used for shaft sealing to solve dynamic sealing constructions. These are the most common and important combination of the braided packings, operating temperature is 2600AAA with PH 3-12 and linear velocity is 10m/s. Carbon fibers: It is light and durable and resistant to high temperature and abrasion. These packings improve sliding properties, flexibility and heat dissipation. Ramie PTFE Packing: It is made of natural ramie yarns with impregnation of PTFE and impregnated in PTFE emulsion while weaving the packing. It is perfect packing for environment with heat shocks and overheating. And the gland packing AAs characteristics which we just mentioned above will enable the packings for longer working life and require little maintenance. How to install the gland packing: it's important to install the gland packing correctly to avoid of any failures during operation. Below are the procedures for the gland packing installation: Lockdown and close valves and relieve all pressure. Remove all the old gland packings from the stuffing box. This packing has excellent mechanical characteristics and resistance to abrasive wear and low friction. It is good way to choose material with full PH range of 0-14. Except above main factors, we also need consider the gland packing dimensions/cross-section of the material. Dimensions / Cross-Section we usually supply: 1/8AAA - 3AAA s; Am opmeit ed odArep nu etnarud equpme ed ojabart rojem nu odatluser omoc jArad euq ol , aguf ed asat atrieb anu a aludn; Alg al etenlaudary eteipra y oipicniip la etenmerbil aguf . sodatsaja etenmerbil o sodaterpa sonep sol ed oded le emot . sollina sol ed n' Aicalatsni al adot ranimret ed s @Aupsed . adreuc al ed seteugap sol ed atcerroc dutingol al o sollina sol ed sotcerroc sorem An sol elatsni . oneller ed ajac al ed ortned etnacibul ereiuger es secev A . agnam al euq oAamats omsim led lirdnam le etroc . etev n . ofitaf ed n' Aisume noc odangerpmi EFTP olib ed oibech /Atse :osou; Arg ed eftf ed ejalabm . orup EFTP ejalabme le noc n' Aicarapmoc ne oAeuepp s; Am n' Aicicir ed etneicifoc nu y n' Aiserp al a n' Aicacae ne otneimidner rojem nu enetI . setanzised sacits; Aretcarac y anewb etemhaer n' Aicir-itna acits; Aretcarac anu anoicropoy otifarg IE . onrotne le ne araseseni n' Aisime al odieucder y oidem led aguf al odnarnoc onrotarg eye le ne oicapse le rallies ovitjeb omoc eneit aludn; Alg al ed euqapme le aludn; Alg al ed ejalabme led n' AicceS . aguf ay oicivres le ne allaf al a /Aricudnoc atcerrocni n' Aiciele anu euq ay etnatropm yum sE . arbez EFTP otifaf ed odampatse ejalabme . dimara ed saniguse noc EFTP otifaf ed ejalabme . adimara ed arbib ed euqapme adimara ed arbib ed euqapme noc odanibmoc EFTP orto . rolac la acinetisier y etanzised otneimidner rojem nu eneit euq ay . eye led dadicolov y n' Aiserp ed ognar royam nu arap odauceda se EFTP otifaf ed ejalabme le euq sartneim . airtanemila airtsudni al y sacin; Aighi seneoicilpa ne azilitu es orup EFTP ejalabme le euq enopus es . etenmatcerroc enoicunf opuqe le y /Artelacerbos es onlles led onrotne le arenam atse ed . eye le y odalles led lairetam led otneimivom le etnarud odareneg rolac le etenmaen; Atnatsni razilaer edeup /odidep a selinopisid n' Atse n @Aibmat selaicapse seteugap o senoienimid sal . cte . ollor; sgk 01 . ollor; sgk 5.2 :raluger eteup p Jmm 57x57 - But don't press anymore. Above are the basic material for braiding the gland packings, usually we can also add stainless wire like Inconel wire and silicon rubber cable to provide the packings with high strength. The most commonly used gland packings: Despite thereeAAAere so many different materials for gland packing and different combination of the material, we can provide almost 20-30 different types of gland packing, but the most commonly used are only several types as below: Graphite Gland Packing: It is made of pure flexible graphite yarn and it has the advantage of good self-lubricity and heat conduction . small friction coefficient, high strength and good softness which can protect the valveAAAAs stem while under operation. Sometimes we can add fiberglass and stainless wire or Inconel wire to strengthen the pure graphite packing and enable the packing shoulder higher pressure and higher temperature and provide a longer working life. PTFE Gland Packing: It is braided with 100% pure PTFE yarn with on other addition to it .
